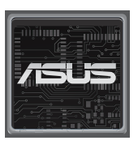
Why ASUS Consumer Desktops?

Quality and Reliability

ASUS Desktops – Leading in Satisfaction with Reliability

ASUS computers reflect a tradition of the finest quality, innovation and longevity. Based on the PCWorld USA 2012 reader survey of tech satisfaction, reliability, and service, users ranked ASUS as a leading choice for desktop PCs, citing high satisfaction with their value, connectivity, ease of use and reliability. The survey also found ASUS desktop PCs were one of the most likely to be recommended to others.



Built by No.1 Motherboards

ASUS Motherboard is No. 1 in market share worldwide and the most award–winning motherboard with 1,042 Awards in 2012 alone.

QuietCool Technology Smart Cooling System

Intelligently reduces dust accumulation on CPU fan and lowers operation temperature by 11.4°C, empowering system stability and longetivity.

Superior Power

Instant full core OC with Turbo Gear

The latest ROG is equipped with the first and only instant all–time full core CPU overclocking without rebooting and BIOS setting. By one button, it takes only one second to setup OC.

UEFI BIOS

Easier System Tweaking and Greater Storage Support

User–friendly graphical BIOS interface offers easier system tweaking and greater storage support. It also natively supports fully–utilized hard drives larger than 2.2TB in 64–bit operating systems.

AI Suite II
All-In-One Interface

AI Suite II

One–stop interface that integrates several ASUS utilities and allows users to operate these utilities simultaneously from energy management, fan–speeds, voltage to sensor reading.

Enhanced Productivity

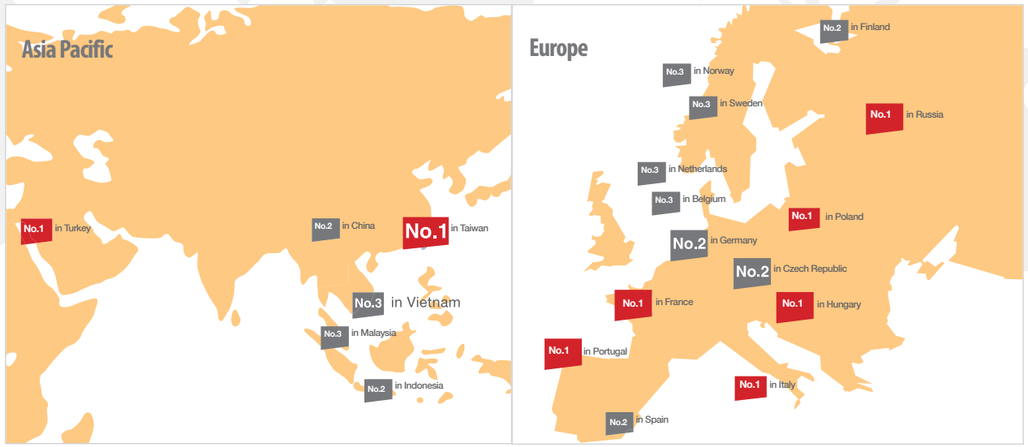
ASUS is the Top 2 Consumer Notebook Brand in the World

According to the latest IDC report (2012 Q4), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- **The Top 1 consumer notebook brand in South East Asia**
- **The Top 1 notebook brand in Central and Eastern Europe**
- **The Top 2 notebook brand in China**
- **The Top 2 notebook brand in Western Europe**
- **The Top 3 Android Tablet Brand in the World**



ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS received 4,168 awards in 2012

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

Zero defects during 600 days in space!
Two ASUS notebooks were selected by R&K, a major computer and electronics supplier to the aerospace industry, to provide astronauts with dependable computing hardware.

"ASUS notebooks never overheat like those made by other companies", said Sergei Avdeev, one of the Russian cosmonauts. "Thermal flow in space and on Earth is completely different. Only notebooks with the best cooling can survive continious operation. We used our ASUS notebooks all day without a problem."

In the air

Helping the NRMA CareFlight helicopter rescue unit save lives.
NRMA CareFlight, an emergency medical and rescue helicopter unit serving New South Wales in Australia, uses ASUS notebooks in different fields, including aviation, medical treatment, and adminstration. ASUS notebooks play a critical role in CareFlight improving survival rates in severe head trauma incidents. They help medical teams arrive on-site faster than ambulances, with fatalities lowered by 33%.

"All out pilots are very impressed with ASUS notebooks and amazed at their ability to withstand aircraft vibration," said Mark Lees, Community Relations Manager of CareFlight. "We are ready to install ASUS notebooks in all our aircrafts and link them to onboard navigation computers."

On the road

Flawless performance during grueling off-road racing.
ASUS notebooks performed critical tasks at the PATAGONIA 2000 race, which saw them used in hote deserts and snow-covered mountains. They acted as navigation devices, exceling due to their built-in GPS functionality and dynamic map displays. They were also mobile communication centers, enabling email and video conferencing.

"Needless to say, ASUS computers survived the severe conditions of this strenuous voyage without a single flaw," said race organiser Aviv Shweky.

At the ends of the earth

Conquering Antarctica.
Perfect performance records in freezing temperatures at the South Pole have been achieved. A December 2003 expedition that included acclaimed mountaineers Shi Wang and Jian Liu set out to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet, where temperatures drop below -100°F. Wang and Liu brought ASUS S200N notebooks to record and share their experiences.

On the world's highest peak

First notebooks to scale Mount Everest.
Conditions at the world's tallest mountain may faze other notebooks, but several ASUS models, including the U5/S6 leather and bamboo editions, W7 and U1 were chosen to accompany an expedition to the top of Mount Everest, know locally as Qomolangma. Upon reaching base camp at 500m, only ASUS notebooks continued to operate. Other notebooks failed to boot due to extremely low ambient temperatures. The U5 even made it to the peak at a height of 8848m, with expedition leader Captain Wang Yongfong carrying it as a tribute to eco-friendly technology and making ASUS the world's first notebooks at the top of Mount Everest.

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (pg 6).

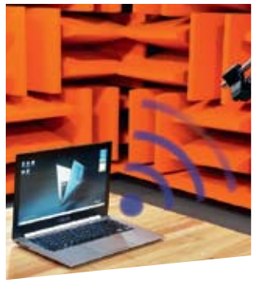
Extreme Test
Ensure Top-Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Keyboard Test
ASUS tests the keyboard to check the comfort and durability, especially on keys that are more frequently used.

Abrasive Test
Abrasive resistance test subjects the exteriors of ASUS notebooks to friction, making sure that the colors and surface materials stay at prime conditions even after extensive and demanding use.



Noise Test
ASUS notebooks undergo meticulous noise testing to help promote a quiet and pleasant computing environment for consumers. Noise mitigation, quiet cooling and component seals are all put to test in this set of trials.

Pressure Test
Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

Hinge Test
Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

Vibration Test
Vibration test puts the notebooks on multiple frequency vibrations to ensure that the frame construction outside and the inside of the notebooks are always attached securely.

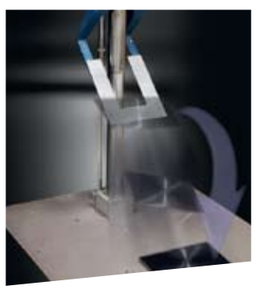
Shock Test
Notebooks are likely to experience shocks during shipping and day-to-day use. This is why ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Spin Test
Most of the notebook covers can be opened with one hand and this means that the screen has to be flexible. Spin tests are carried out to measure how well the lid is able to protect the notebook by testing it with a twist on the overall framework to an extreme degree.

High Acceleration Test
HALT test (Highly Accelerated Life Test) tests notebooks in high speed stimulations to simulate the movement of a mobile notebook, with an extensive analysis of our engineers to reduce the problems that may occur during transportation.

Port Test
Each port is tested to ensure that it remains strong and solid despite the continuous plug and unplug actions.

Temperature Test
Each ASUS notebook went through many trials to be able to continue to operate in diverse climates. One of the tests is to stimulate an environment of high humidity and low, and also in extreme temperature conditions. Each weak point in the material and framework is strengthened. This is the reason ASUS notebooks have high durability.



Fall Test
A dropped notebook shouldn't mean a broken notebook and ASUS puts its notebooks through a series of drop tests to measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

ASUS received 4,168 awards in 2012

A testament to our relentless innovation and the result from years of research in design and manufacturing techniques, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide. This can only be achieved by a company with vision and mission to pursue the best innovation.

ASUS is increasingly placing emphasis on tablets and smartphones to stay ahead with consumers' changing lifestyle needs, and once again our innovation and persistence in perfection leads to a total of 798 awards for tablets and smartphones!

iF Design Awards

ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.

Innovation International CES Awards

Six ASUS products have been selected for the CES 2012 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation • Persistent Perfection has resulted in such wide recognition for our products.

ASUS TAICHI™

The Incredible Fusion of Notebook and Tablet

Combining a Notebook and a Tablet

The ASUS TAICHI™ is an incredible combination of notebook and tablet whose double-sided Full HD IPS display switches seamlessly between modes at a touch. Lid open, TAICHI™ is a notebook with a full-size backlit keyboard. Lid is closed, TAICHI™ instantly transforms into a multi-touch tablet. Both TAICHI™ screens work independently and simultaneously too, so people can share its powerful Intel® Core™ i7 processor, astonishing SonicMaster audio co-developed with Bang & Olufsen ICEpower®, dual HD camera and array microphones.

1080P Full HD · Touch Screen · 2-SEC INSTANT ON · USB 3.0 · Bluetooth 4.0 · micro HDMI · Quick Charge · SonicMaster

ASUS recommends Windows 8 Pro.

ENHANCED PRODUCTIVITY

One-Finger Mode Switching

Want to switch from your laptop mode to tablet mode? Just use one finger to close the lid of TAICHI. Instantly it transforms from a laptop into a tablet interface. It's that simple.

TAICHI Stylus

Use TAICHI Stylus to sketch or to write notes in Tablet or Extend mode. Expand the scope of work achievable with ASUS TAICHI and its Stylus. Now you can enhance your productivity regardless of the nature of tasks with TAICHI.

TAICHI™ SHARING : 4 Display Modes

It's a notebook. It's a tablet. More than that, the unique function of TAICHI which enables you to switch to 4 different display modes gives you the unparalleled flexibility of sharing with your boss, colleagues to friends and family, giving you your desired privacy with the 4 different modes.

Lift the lid with one smooth motion and TAICHI becomes a fully featured notebook. The Full HD 11.6" screen features IPS technology for a vibrant image with wide viewing angles. The backlit keyboard with ambient light control and large multi-touch touchpad make light of productivity tasks too.

Close the lid and TAICHI instantly becomes a tablet. 10-point multi-touch Full HD screen gives complete fingertip control and the supplied stylus works just like a pen on paper for accurate handwritten notes and sketches, plus IPS technology keeps the iamge bright and clear. Built-in motion sensors also make TAICHI the ideal for mobile gaming.

Only TAICHI gives you 2 display screens with its Mirror mode. With the lid open and Mirror mode enabled, the 2 screens are able to display the same image which makes TAICHI perfect for sharing your favourite movie or software demonstration. IPS display technology ensures a bright, vibrant image with wide viewing angles on both screens too.

In Extend mode, TAICHI is no longer one computer - it's two. When enabled, the 2 screens can be used by 2 people at once, as a notebook as well as a tablet. Extend mode is ideal for presentations and the supplied Screen Share app lets the presenter see the script on one screen while the audience views the slides on the other.

INCREDIBLE BEAUTY

Dual High-Definition Display Screens

The ASUS TAICHI™ gives a spectacular high-definition view with apps, games and movies thanks to two 1080p Full HD displays. IPS technology ensures a brillant image with accurate colours and crisp contrast, while the 178° wide viewing angle keeps each screen crystal-clear even when seen from the side. TAICHI can capture incredible images too, thanks to HD camera in both notebook and tablet modes.

Thin and Light

Even with two screens, ASUS TAICHI is able to maintain its sleekness with a front profile of 3mm and rear profile of 16.5mm. Besides that, the 1.25kg light weight adds to the ease of mobility.

TAICHI Exterior Interface

Use TAICHI as a tablet with the lid closed, or utilize TAICHI's Mirror or Extend modes for sharing your content.

TAICHI Interior Interface

Use TAICHI as a fully featured notebook with the lid opened.

1TB SATA HDD / 8GB DDR3 RAM

High Capacity Storage & Memory

Store your high-definition files on your ASUS N Series laptop with the high capacity built-in storage. What's more, with a high 8GB memory, now you can open your large videos and photos in a shorter time.

STUNNING VISUALS

6mm Small Touch Points

All-Glass Touchscreen. Intuitive Small Touch Points of 6mm.

ASUS N Series ushers in completely new touch experiences with its all-glass panel. Smooth throughout, the responsive touchscreen means your fingers can slide edge to edge naturally and unhindered. With small touch points of 6mm, what it means is even the small fingers of toddlers are able to operate the ASUS touchscreen laptops smoothly.

INCREDIBLE AUDIO

True-to-Life Audio Experience

Featuring co-development with Bang & Olufsen ICEpower® and Waves MaxxAudio, upgraded SonicMaster Premium utilizes professional sound processing tools to boost audio fidelity and enjoyment. In addition to a wider range and improved clarity, N Series notebooks include a bundled subwoofer for extra-impactful bass, culminating in the finest audio on any portable PC.

Crystal Clear Sound

Every note and nuance comes across to listeners in pure fidelity with no compromise.

Wide Frequency

ASUS SonicMaster retains a professional grade frequency range that is similar to stand-alone Hi-Fi systems.

Distinct Vocals

SonicMaster boosts vocals with clarity and power, giving you an impression of a live performance.

Deeper and richer bass

ASUS N Series with its larger speaker chambers and bass extension algorithms ensures powerful bass.

Higher Volume

The amplifier in ASUS N Series laptops receives higher voltage as compared to other laptops, enabling playbacks at significantly higher volume.

SonicMaster Subwoofer

ASUS SonicMaster subwoofer is included in every ASUS N Series laptops to give you an extra boost to bass performance.
